MASTER OF ARTS

Version: MAC-0-12/12/2018
The need for preservation, conservation, and rehabilitation of heritage sites is not new, however, working as an expert in the restoration sector is a relatively young specialization in architecture worldwide. In the changing scenario of uncertainty in the world, enhanced efforts to preserve the cultural and architectural heritage for the next generation are required.

SKILLS ACQUIRED

The Master’s Program 'Architectural and Cultural Heritage' is the formal teaching approach in this area. We endeavor to develop new knowledge, raise new questions based on the changing contexts, while at the same time equip ourselves with the best practices in the sector of Building Restoration. Our program is an amalgamation of Theory, Design, and Research and is closely connected with the region's UNESCO World Heritage Sites, the State Office for the Preservation of Historical Monuments in Saxony-Anhalt, and the State Archives in Saxony-Anhalt.

MAJOR FIELDS OF STUDY

- Architectural Heritage Preservation
- Historic Gardens
- Architectural Theory
- Urban Design
- Conservation and Organic Material
- Design and Historical Cities

PROGRAM DURATION

4 semesters (120 Credits)

START OF PROGRAM

Winter or summer semester

CAREER PROSPECTS

There are countless career possibilities for graduates of the Architectural and Cultural Heritage Master's Degree Program. Some popular choices include working as an expert in restoration projects, project management for historical sites, developing concepts for a thoughtful and intentional approach to restoration and conservation of monuments/buildings, and historical building research work, often to work in and contribute to the academic field.
