About the University

Located in the State of Sachsen Anhalt, the Anhalt University of Applied Sciences offers innovative teaching and research at international level and with international study quality and quality of life at three sites in Bernburg, Dessau and Köthen. 65 Bachelor's and Master's courses in seven departments prepare over 7,900 students – including 1,900 international students.

The Anhalt University of Applied Sciences is based in three beautiful cities - Köthen, Bernburg and Dessau. Köthen traditionally is an important centre of culture and education, Bernburg focuses on the natural sciences and Dessau is home to the Bauhaus, renowned worldwide for architecture and design.

A photograph of a classroom or workshop environment. In the foreground, a man with glasses and a blue checkered shirt is looking at a laptop screen. To his right, another man is partially visible, looking towards the laptop. In the background, several other students are seated at tables, some working on laptops. The room has wooden chairs and tables, and a window is visible in the background.

Master of Landscape Architecture, Anhalt University Bernburg

The Master's Program of Landscape Architecture is taught at the Bernburg Campus which is a unique campus with university and residential buildings. The splendid Old Town of Bernburg is located directly on the River Saale and green spaces full of herbaceous gardens and plants all around. The Bernburg-Strenzfeld campus offers marvellous study quality and quality of life. It is home to the Agriculture, Ecotrophology and Landscaping department (Dept.1) and the Economics department (Dept. 2). Well equipped sports facilities and attractive leisure opportunities offer the perfect counterbalance to academic study. 53 professors look after around 2,700 students. The international two year full-time accredited program Master of Landscape Architecture is a design-based professional program aimed at applicants with academic and professional achievements with the potential for professional leadership.

The program benefits from its unique relationship with the Master programs in architecture, nature conservation and other related fields at the Anhalt University of Applied Sciences as well as with the world-famous "Bauhaus" – a revolutionary movement in architecture, art and design. Since its conception in 1998, the Master of Landscape Architecture program aims to provide an intellectual base of knowledge in the field of landscape architecture and enable students to evolve sustainable solutions to current landscape architectural challenges.

The Curriculum

The new curriculum conceived in 2014 develops this focus further to emphasize design and the European context with current and innovative landscape and urban design of landscape architecture forming highlights of the program. Co-operations with leading universities in landscape architecture in Europe and USA and landscape professionals enable the MLA program to offer real-time projects on current issues and extend the base of knowledge of the professional field beyond the academic theories. The Master of Landscape Architecture program at the Anhalt University of Applied Sciences leads to an accredited Master of Arts (M.A.) degree in Landscape Architecture.

The People at MLA

Prof. Dr. Matthias Pietsch
G.I.S. and Remote Sensing

Prof. Einar Kretzler
MLA Program Director

Dr. Elke Eckhardt
MLA Program Co-ordinator

Prof. Dr. Nicole Uhrig
MLA Studio Incharge

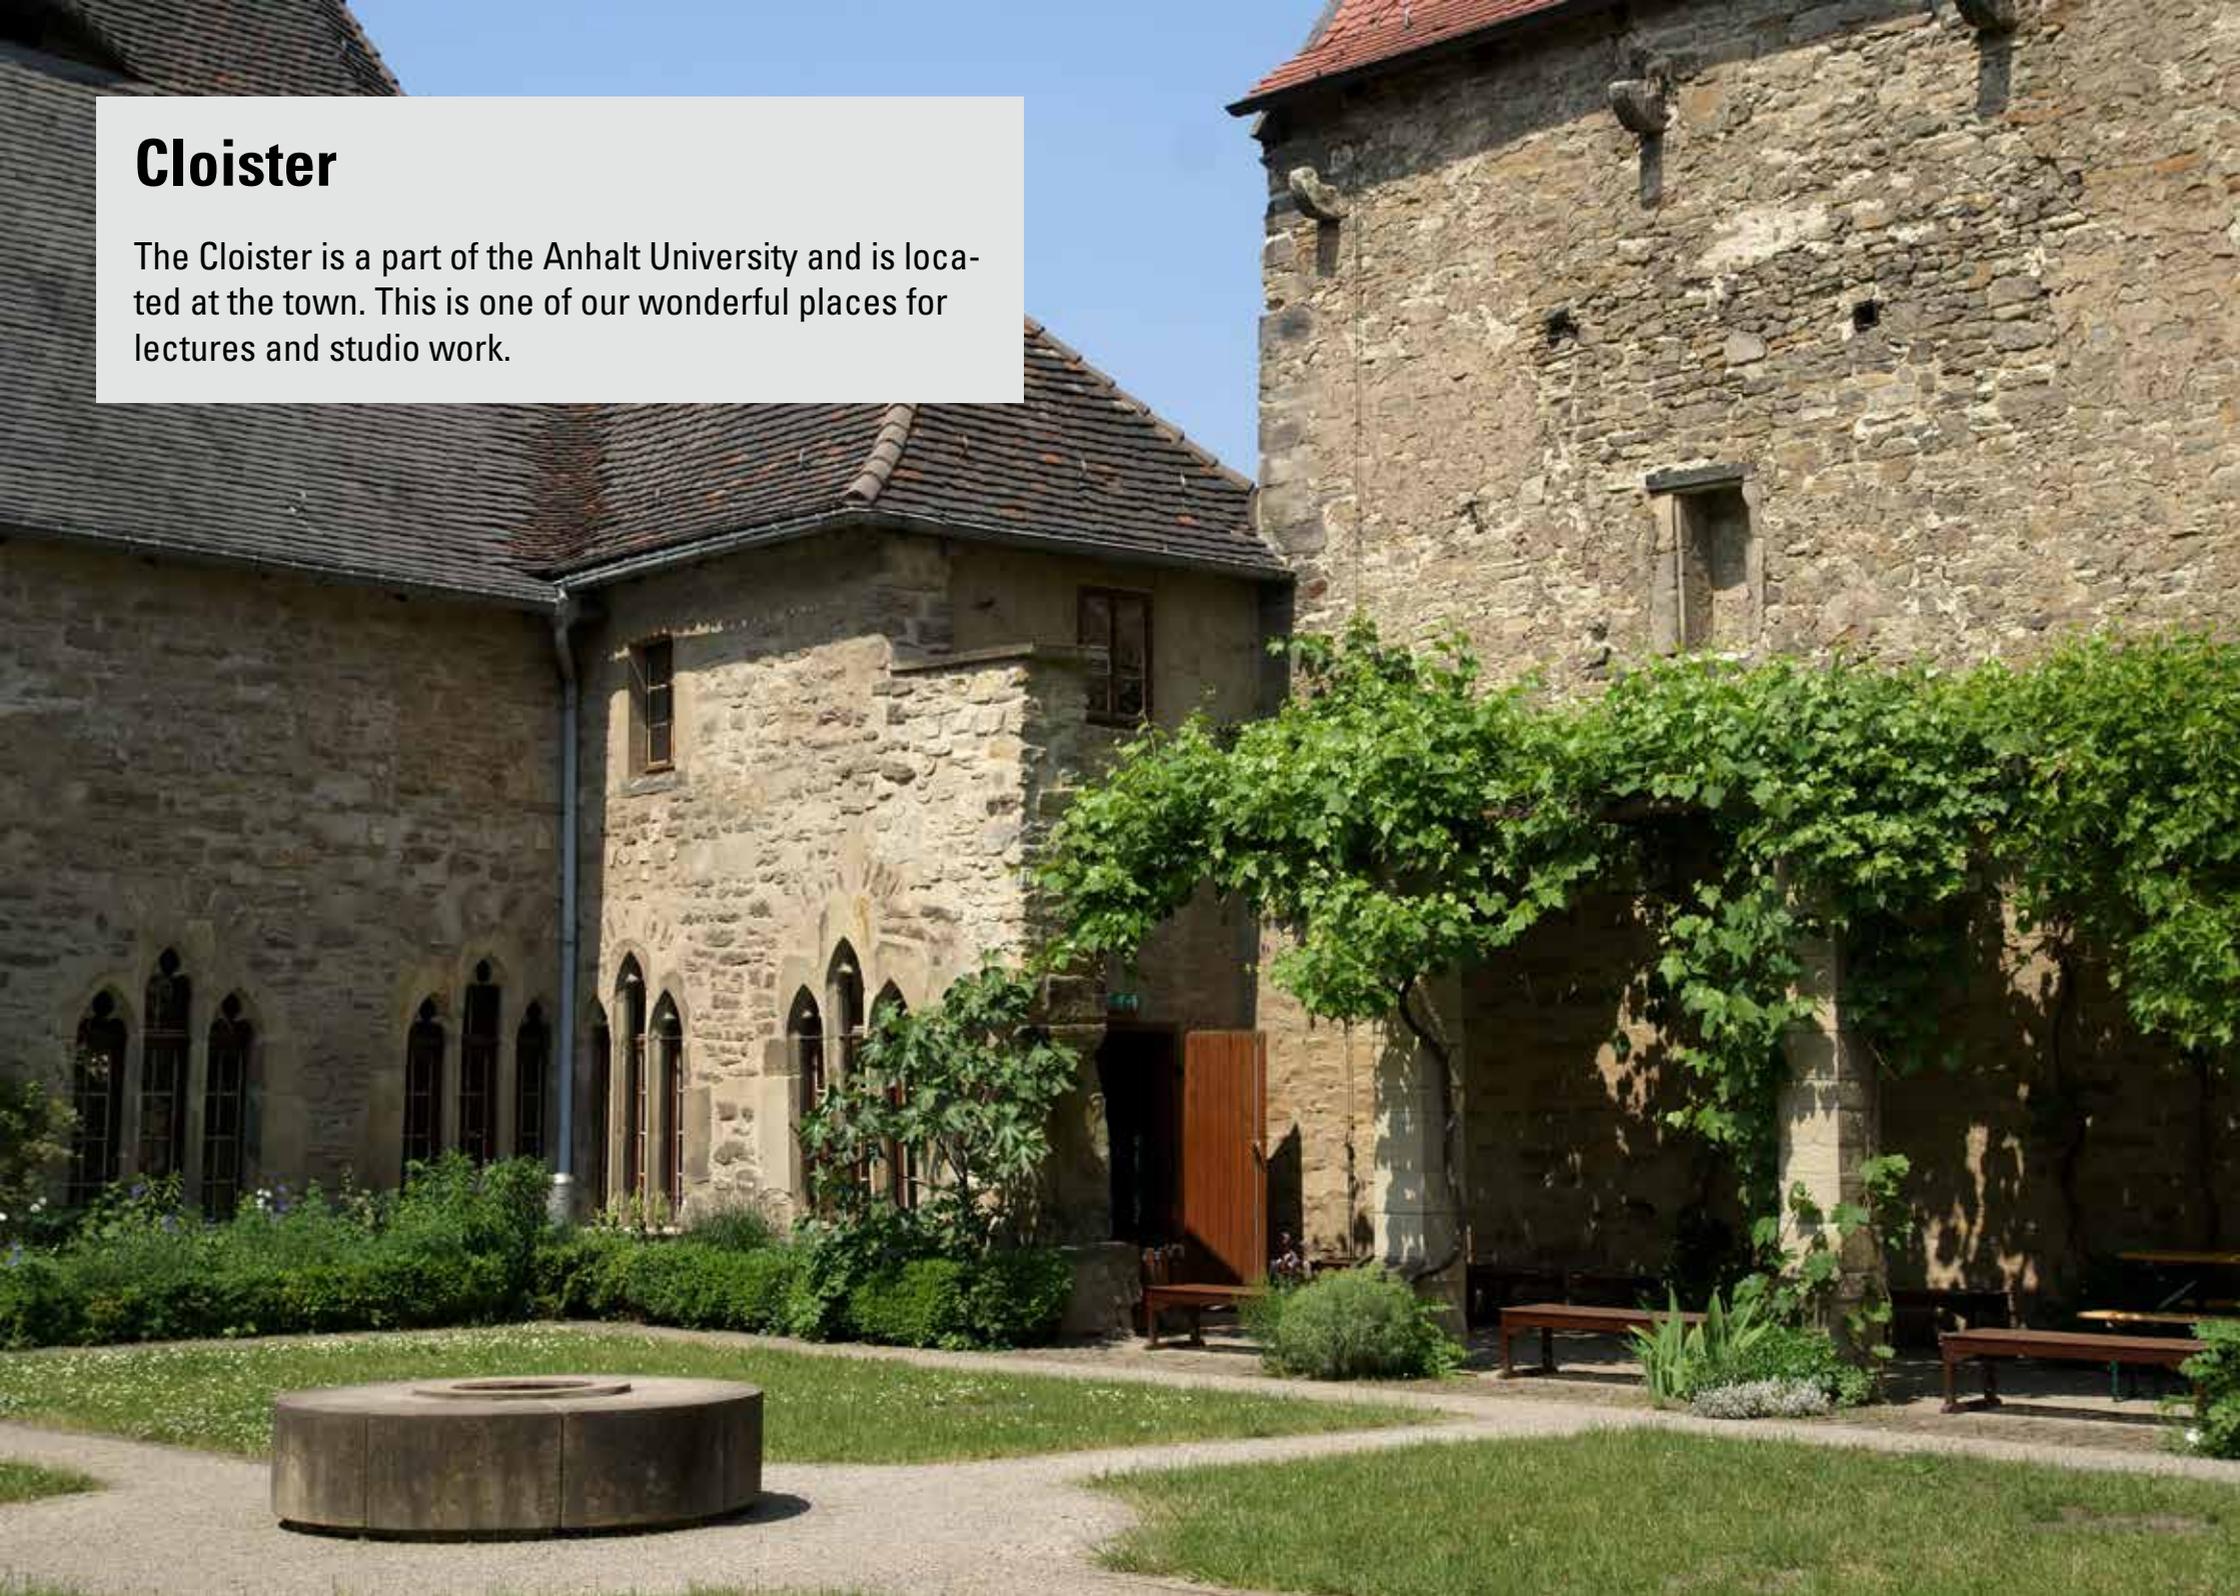

Prof. Dr. Wolfram Kircher
Planting Design

The masters program has extremely competent professors and visiting faculty, from insititutes all over Germany. The team of Professors at MLA involves more than 20 academics and practioners from different fields who teach a wide spectrum of different subjects.

The MLA team has experts and professionals who have worked, studied and have gathered years of experience in their respective fields.

Cloister

The Cloister is a part of the Anhalt University and is located at the town. This is one of our wonderful places for lectures and studio work.

Innovation studio

This house is located at the campus. We use it for a part of our lectures and studio work.

Excursions

Since the entire approach of the masters program is field and practice oriented, the curriculum includes many excursions in Germany as well as in Europe, in order to impart the students with the actual knowledge and essence of landscapes.

Excursion to the Bauhaus in Dessau

About Bernburg

Bernburg is a city at the heart of the state of Sachsen Anhalt and is also the district capital of the the Salzkreisland. It is located on the river Saale, It was the former residence of the prince of Anhalt and is famous for it's renaissance Castle, old heritage buildings like the Cloister or the Churches, which are still very much a part of the city's functional buildings. The old Rathaus (town hall) and the Cloister are often used by the Hochschule Anhalt for holding classes in the city, away from the campus.

Testimonials

M.L.A at Hochschule Anhalt has given me many opportunities to learn not just academically but experientially. The course was intensive and I learnt a lot through excursions, helpful Professors and Instructors who teach in a way that makes you understand clearly, with good examples. Bernburg was a very beautiful area, peaceful and filled with flora which is an advantage for the purpose of studying. I am currently working as an Architect and Urban Planner at Karl Dudler Architekten, Frankfurt am Main

- Timothy Tiri, Kenya -

I am currently working for an office in Hamburg. My impression about the MLa course was simply amazing. I gathered a lot of useful knowledge for my career from here. In addition to that, my international friends from the course brought me so many interesting perspectives and experiences about landscape architecture, which I really appreciate.

- Yen Nguyen, Vietnam -

I really want to thank Anhalt University, Bernburg and our Professors especially Prof. Nicole. I still remember that the Professors took us through excursions in different cities to gather knowledge and skills about design, we really enjoyed the process of team work, although that was not easy to accomplish. I still remember the tour of Italy where we laughed a lot and at the same time learnt a lot as well. At present, I am teaching at the Hangzhou Vocational and Technical College (Architecture and landscape design department) in China.

- Xiao Xiang, China -

It was a great experience studying at Anhalt. My batch was a real great mix of people from all around the world. The teaching staff is really helpful. We don't just learn about Landscape but as well as about other cultures from our professors and from our fellow students. At the moment I am working at Kuttner und Kahl Landscape Architects as an Objekt Planer.

- Hushaam Ali, Pakistan -

I was looking for a new way of thinking and working on projects, and I found it here at MLA, while attending lectures, participating in various discussions, and dealing with a team-work in studio projects. I wanted to get some experience of working in an international environment, to understand people of other cultures, and this program provided it to me. I have been blessed to meet with people with huge talent and abilities to explain complex things in few words. It's all MLA! I am currently working as an architect at the Genplan Institute of Moscow and am involved in a lot of Urban Planning Projects

- Liudmila Garaeva, Russia -
