3rd German-African Green Hydrogen Forum

2025

Bernburg (Saale) | Germany

As green hydrogen emerges as a pivotal driver of the global energy transition and decarbonization efforts, the EU and Germany's ambitious goal of reaching net-zero emissions by 2045 is set to accelerate the demand for sustainable hydrogen. Africa, with its vast renewable energy potential, is primed to become a powerhouse in green hydrogen, unlocking vast economic growth and innovation. Join us at the third German-African Green Hydrogen Forum, hosted by Anhalt University of Applied Sciences, where experts, investors, and scientists will dive into the exciting future of the hydrogen economy!
