Remote Access: manual
– configuration in Windows and macOS

For external access to our digital content please adjust the following settings depending on your operating system.

Table of contents

1 Remote Access on Windows 2
2 Remote Access on macOS 4
3 Browser configurations in firefox 6
4 Reverse Proxy-settings 7
5Forgot password? 8
1 Remote Access on Windows

1. Please choose ‘Network and Internet’ in the Windows settings.

![Windows Network and Internet settings]

2. Select ‘Proxy’ for further options.

![Windows Proxy settings]
3. At ‘automatic proxy settings’, please select ‘detect settings automatically’ and ‘use setup script’. Enter the following Proxy-address below: http://gate-03.network.hs-anhalt.de/proxy.pac and click ‘save’.

Please use the login for your university account (HIS etc.)

Authentification

To access our licensed electronic content, you will be asked to enter your user name and password.
2 Remote Access on macOS

1. Please select 'Network' under 'system settings'.

2. Choose 'more options'.
To access our licensed electronic content, you will be asked to enter your **user name** and **password**.

**Authentification**

Please use the **login** for your university account (HIS etc.)

**Proxy-Authentifizierung erforderlich**

3 Browser configurations in firefox

Firefox eventually doesn’t take over the proxy settings from the system.
In this case please follow further instructions below:

1. Open firefox-browser and choose ‘settings’. Then scroll down to ‘connection settings’.

2. Select ‘use system proxy settings’. Click ‘OK’ to save settings.
4 Reverse Proxy-settings

If you don’t need access to our external digital content any more or if you are no longer authorised to use it via Anhalt University of Applied Sciences, please undo the configurations and delete the proxy address.
5 Forgot password?

Reset or change password - SelfService

To reset or change your password please click here. You will be led to SelfService-Center. For further information you can visit IT-Service-Center.

The service includes changing and resetting the password for standard ISC services, which include:
- SelfService,
- WLAN,
- External access to the databases of University library

Reset your password

If you have forgotten your password, you can set a new password. After entering your user ID and a correct password, you will receive an e-mail with a confirmation link to the address stored in the system. Your new password will be activated 15 minutes after successful confirmation at the latest.

Change your password

You will need your user ID and a valid password to alter it. A successful change becomes effective at the latest 15 minutes after completion.
